

EDUGENIE — BRAINSTORMING & IDEA PRIORITIZATION

=====

1. PROBLEM IDENTIFIED

Students at all academic levels struggle to access quick, reliable, and affordable learning support. Tuition classes are expensive, textbooks are static, and searching Google for answers often leads to unreliable or overly complex results. Students need a single AI-powered tool that can answer questions, explain concepts, generate quizzes, and create learning paths on demand.

2. IDEAS GENERATED

Idea A: A PDF-based study notes library (no AI, no personalization)

Idea B: A tutoring marketplace connecting students with teachers (high cost)

Idea C: An AI-powered learning assistant using Google Gemini (SELECTED)

Idea D: A flashcard app with spaced repetition (limited scope)

3. PRIORITIZATION MATRIX

Idea	Feasibility	Impact	Innovation	Cost	Total
----	-----	-----	-----	----	-----
A	9/10	4/10	2/10	10/10	25
B	4/10	7/10	3/10	4/10	18
C	9/10	9/10	9/10	10/10	37 ← SELECTED
D	8/10	5/10	4/10	9/10	26

4. FINAL SELECTED IDEA

EduGenie: A lightweight AI-powered educational assistant built with FastAPI and Google Gemini. It offers five core features: Q&A, topic explanation, text summarization, quiz generation, and personalized learning path recommendations — all inside a simple web interface.
