

EDUGENIE — PROJECT EXECUTABLE FILES

=====

All project files are available at:

<https://github.com/luci/EduGenie>

FILE LISTING

Root files:

- .env (Gemini API key — NOT in GitHub)
- .gitignore
- requirements.txt
- README.md

Application code (app/):

- app/__init__.py (empty)
- app/main.py (all routes + AI logic)

Templates (templates/):

- templates/index.html (single-page UI with 5 cards)

Static assets (static/):

- static/style.css (all styling)

HOW TO RUN

1. Clone:

```
git clone https://github.com/luci/EduGenie.git  
cd EduGenie
```

2. Create virtual environment:

```
python -m venv venv  
venv\Scripts\activate
```

3. Install dependencies:

```
python -m pip install -r requirements.txt
```

4. Create .env with:

```
GOOGLE_API_KEY=AIzaSyYourActualKeyHere
```

5. Run the server:

```
python -m uvicorn app.main:app --reload
```

6. Open in browser:

```
http://127.0.0.1:8000
```

FILE SIZE SUMMARY

- Total source code: under 10 KB
- requirements.txt: under 100 bytes
- No bundled binaries
- Uses only free-tier APIs
