

EDUGENIE — TEAM INVOLVEMENT IN DEMONSTRATION

=====

TEAM COMPOSITION

Total Members: 4

- 1. Sai Ganesh S — Team Lead & Full Stack Developer**
- 2. K Kishore Kumar — AI Integration Specialist**
- 3. Bala — Backend & API Developer**
- 4. Yuvaraj B — Frontend & UI Designer / QA Engineer**

TEAM ROLES & RESPONSIBILITIES

1. Sai Ganesh S — Team Lead & Full Stack Developer

- Architected the overall project structure**
- Built the FastAPI backend and wrote app/main.py**
- Integrated Google Gemini using the shared _gen() helper**
- Managed the GitHub repository, commits, and pushes**
- Wrote and compiled the 8-phase documentation**
- Recorded and edited the final demo video**
- Coordinated daily stand-ups and task allocation**
- Time split: 40% development, 30% coordination, 30% documentation**

2. K Kishore Kumar — AI Integration Specialist

- Selected the Gemini model (gemini-3.8-flash) for all features
- Designed and fine-tuned the prompts for Q&A, explanation, summarisation, quiz generation, and learning paths
- Handled Gemini API errors, rate limits, and retry logic
- Validated the quality of AI-generated content
- Time split: 70% AI integration, 20% testing, 10% documentation

3. Bala — Backend & API Developer

- Implemented the five FastAPI routes (qa, explain, summarize, quiz, learn/recommendations)
- Parsed JSON responses from Gemini for quiz generation
- Ensured request validation and error handling
- Wrote the requirements.txt and set up the virtual environment
- Time split: 80% backend coding, 15% testing, 5% documentation

4. Yuvaraj B — Frontend & UI Designer / QA Engineer

- Designed templates/index.html with five clean input cards
- Wrote static/style.css for a minimal, distraction-free interface
- Implemented JavaScript fetch calls for all five features
- Tested the application on desktop and mobile browsers
- Reported bugs and verified fixes before final demo
- Time split: 50% frontend, 40% QA, 10% documentation

DEMONSTRATION RESPONSIBILITIES

During the final project demonstration:

- Sai Ganesh S introduces the project and explains the problem statement**
- K Kishore Kumar demonstrates the Q&A, Explanation, and Quiz features**
- Bala demonstrates the Summarisation feature and walks through the backend code**
- Yuvaraj B demonstrates the Learning Path feature and shows the responsive UI**

Each member speaks for approximately 1 minute, keeping the total demo under 5 minutes.

TEAM COLLABORATION TOOLS USED

- WhatsApp group for daily communication**
- GitHub for version control and code sharing**
- Google Meet for weekly review calls**
- Google Drive for storing demo videos and documentation**
- VS Code Live Share for pair programming sessions**

CONCLUSION

All four members contributed equally to the success of EduGenie.

The clear division of roles ensured that development, AI integration, testing, and documentation progressed in parallel, allowing the project to be completed on time and to a high standard.
